\$19.4M in Financing to Improve Ohio Wastewater and Drinking Water

Communities in southeast Ohio are receiving \$19.4 million in financing through the Ohio EPA to improve Ohio wastewater and drinking water infrastructure.

Zanesville, Nelsonville, Barnesville, New Straitsville, Scio, Warsaw, South Point, Coalton, Highland Ridge Water and Sewer Association, Inc., the Muskingum Watershed Conservancy District, and Harrison County are among the southeast Ohio water utilities receiving portions of approximately **\$19.4 million in low-interest and principal forgiveness funding**. The funding, made possible by the Ohio Environmental Protection Agency (EPA), is projected to save the communities nearly \$11 million on interest alone.

Solving Kentucky Wastewater Infrastructure Challenges in Bullitt County

Louisville, Kentucky's Metropolitan Sewer District, MSD is in the process of improving troubled Kentucky wastewater infrastructure in nearby Bullitt County.

In 2021, [MSD](#) acquired the Bullitt County, Kentucky wastewater infrastructure and facilities previously operated by the [Bullitt County Sanitation District](#). At the time, Bullitt County's wastewater infrastructure was overcapacity, needed updating, and was at risk of leaking waste into public water.

The acquisition was possible under a 2018 State of Kentucky law that granted utilities the ability to own assets outside of their originally chartered borders. As the MSD observes, Kentucky waterways make their way to the Ohio River, "meandering over county lines." The flexibility to problem-solve regionally rather than jurisdictionally potentially eliminates the duplication of administrative and operational costs in multiple counties within the same watershed.
